

In the Claims:

Please cancel without prejudice or disclaimer claims 284-291.

Please add the following new claims 295-306.

94.
295. (Newly Added -- See Old Allowable Claim 285) A method of forming printable media, comprising:

providing a laminate cardstock including (1) a liner sheet including a paper sheet and ultraremovable adhesive on the paper sheet, and (2) a cardstock sheet adhered to the ultraremovable adhesive;

cutting through the cardstock sheet to the paper sheet to form cardstock cut lines defining at least in part perimeters of printable media;

cutting through an outer face of the liner sheet to form a liner-sheet cut line defining a leading or trailing edge liner sheet waste strip on a back side of the laminate cardstock; and

removing the waste strip from the back side before feeding the cardstock sheet through a printer or copier.

E 95 94.
296. (Newly Added) The method of claim 295 wherein the sheet waste strip is about 1/4 inch wide.

96 94.
297. (Newly Added) The method of claim 295 wherein the liner sheet includes an adhesive-receptive coating on the paper sheet, and the ultraremovable adhesive is on the coating.

97 94.
298. (Newly Added) The method of claim 295 wherein the printable media comprise business cards.

98 94.
299. (Newly Added) The method of claim 295 wherein the cutting through the cardstock sheet and the cutting through the outer face both comprise die cutting.

99.
300. (Newly Added -- See Old Allowable Claim 287) A method of forming printable media, comprising:

providing a laminate cardstock including (1) a liner sheet including a paper sheet and ultraremovable adhesive on the paper sheet, and (2) a cardstock sheet adhered to the ultraremovable adhesive;

cutting through the cardstock sheet to the paper sheet to form cardstock cut lines defining at least in part perimeters of printable media; and

cutting through an outer face of the liner sheet to form a liner-sheet cut line defining a leading or trailing edge liner sheet strip on a back side of the laminate cardstock;

wherein the liner-sheet cut line defines a flexibility cut line assisting in the feeding of the cardstock sheet through a printer or copier.

^{100.}
~~301.~~ (Newly Added -- See Old Allowable Claim 288) The method of claim ~~300~~^{99.} wherein the flexibility cut line is parallel to and spaced about a 1/4 inch from the leading or trailing edge of the cardstock sheet.

^{101.}
~~302.~~ (Newly Added) The method of claim ~~300~~^{99.} wherein the liner sheet includes an adhesive-receptive coating on the paper sheet, and the ultraremovable adhesive is on the coating.

^{102.}
~~303.~~ (Newly Added) The method of claim ~~300~~^{99.} wherein the printable media comprise business cards.

^{103.}
~~304.~~ (Newly Added) The method of claim ~~300~~^{99.} wherein the cutting through the cardstock sheet and the cutting through an outer face of the liner sheet both comprise die cutting.

^{104.}
~~305.~~ (Newly Added) The method of claim ~~267~~^{74.} wherein the forming includes the through-cut lines being a matrix of intersecting lateral and longitudinal through-cut lines.

^{105.}
~~306.~~ (Newly Added) The method of claim ~~268~~^{75.} further comprising before the feeding, die cutting the liner sheet to form liner sheet continuous through cut-lines through the liner sheet to the facestock sheet.
